

# Decentralized Claims Protocol Specification (DCP)

Roadmap Plan

# Goals

- A specification for *decentralized* identity
  - How Verifiable Claims are issued and presented in a way that does not rely on a central identity provider
  - Focused on *organizational use cases* involving dataspace
- Is approved by the Eclipse Dataspace Working Group (EDWG) and the Eclipse Foundation
  - TCK – Test Compatibility Kit
  - At least one conformant implementation that passes the TCK
    - EDC Identity Hub, others are welcome!
  - Will be a requirement for dataspace interop
- Fast-track submission to ISO

# Project Status

- Starting working group activities
- Almost completed transition to ReSpec
  - <https://respec.org/docs/>
- Meetings will be held weekly on Thursdays 9:30-10:00
  - Intended as a sync point
  - Work done through discussions, issues, and ad-hoc meetings
- Starting point
  - <https://github.com/eclipse-dataspace-dcp/decentralized-claims-protocol>

# Proposed Timeline
